AI Tools arxitekturas

Yo'l xaritasi

Yaratilgan: 2026-yil 13-iyun · Loyiha: creative-tools-saas (AssetFlow)
Manbalar: Higgsfield v1.0.14 · Motion Factory v4.9.5 · AssetFlow v1.1.1

Mundarija

- 1. **Boshqaruv xulosasi** — asosiy xulosa va tavsiya
- 2. **Uch plaginning UI/UX tahlili** — Higgsfield, Motion Factory, AssetFlow dizayn tili
- 3. **Dizayn tokenlari taqqoslash jadvali** — rang, shrift, masofa, radius
- 4. **AssetFlow UI/UX kamchiliklari** — 19 ta aniq muammo, ustuvorlik bo'yicha
- 5. **Birlashtirilgan dizayn tizimi** — ikkala dizaynni AssetFlow'ga qo'llash mumkinmi?
- 6. **AI Tools bo'limini qo'shish** — to'liq arxitektura, UI, backend, kod
- 7. **Yo'l xaritasi** — ustuvorlik tartibida harakatlar rejasi

Bir jumlada xulosa

AssetFlow'ning

backend va biznes-mantiqi

ikkala referensdan ham kuchli; lekin

UI/UX va dizayn izchilligi

ortda. Yaxshi xabar — uchala plugin ham

bir xil lime-yashil aksent

oilasidan foydalanadi, shuning uchun ikkala dizaynni birlashtirib AssetFlow'ga qo'llash nafaqat mumkin, balki tabiiy. AI Tools esa mavjud auth + subscription tizimingiz ustiga proxy-route'lar orqali oson o'rnatiladi.

1. Boshqaruv xulosasi

Uchala plugin bitta janr — Adobe ichidagi kreativ kontent paneli. Ammo har biri boshqacha kuchli tomonga ega:

Higgsfield React + Vite + Tailwind v4 Kuchli: Zamonaviy AI-tool UX. Model tanlash, prompt composer, parametr slayderlari, generatsiya progress effektlari — sanoat darajasida sayqallangan. Dizayn tili: Qora fon + neon lime <code>#d1fe17</code>. Minimalist, ko'p bo'sh joy, yumaloq burchaklar, backdrop-blur.	Motion Factory Vanilla JS + Web Components Kuchli: Yig'iladigan yon-panel navigatsiyasi, Algolia qidiruv, hover-video kartalar, AI ovoz/SFX generatsiyasi to'liq integratsiya qilingan. Dizayn tili: Charcoal <code>#161515</code> + lime <code>#91D010</code> + ko'k tanlash <code>#327BFA</code>. Inter shrifti, 200ms o'tishlar.	AssetFlow (sizniki) Vanilla HTML/JS/CSS Kuchli: To'liq SaaS backend, JWT+PluginToken auth, contributor workflow, moderatsiya, subscription, audit log, SSE. Zaif: Dizayn izchilligi, juda mayda shriftlar, ikki xil aksent rang, hover-only tugmalar, AI bo'limi yo'q.
---	--	---

Asosiy xulosalar

- ✔ **Arxitektura ustunligi sizda** — to'liq backend, contributor workflow va moderatsiya ikkala referensda ham yo'q.
- ▲ **Dizayn qarzi (design debt)** — AssetFlow'da ikki avlod UI aralashgan: yashil brend bilan eski indigo `#6366f1` qoldiqlari to'qnashadi; shriftlar 5–9px gacha tushib ketadi.
- ✔ **Ranglar allaqachon mos** — Higgsfield `#d1fe17`, Motion Factory `#91D010`, AssetFlow `#82c341` — uchchalasi bir oilada. Birlashtirish uchun rang almashtirish shart emas, faqat **izchillashtirish** kerak.
- ✗ **AI Tools yo'q** — "creative-tools-saas" pozitsiyasiga ega mahsulot uchun bu eng katta funksional bo'shliq.

2. Uch plaginning UI/UX tahlili

2.1 Higgsfield — AI-birinchi minimalizm

#d1fe17
Neon lime (CTA)

#0a0a0a
Asosiy fon

#1c1e20
Surface

#9ea2ad
Muted matn

#f7f7f8
Matn

Shrift	system-ui sans-serif; o'lchamlar 10–18px, og'irlik 400–700
Radius shkalasi	4 → 6 → 8 → 12 → 16px (izchil progressiya), pill = 999px
Masofa	4px asosiy birlik (Tailwind), tugma balandligi 40/44/56px
O'tishlar	0.15s cubic-bezier(.4,0,.2,1); active holatda <code>scale(0.98)</code>
Effektlar	backdrop-blur 24–40px, inset shadow, lime glow <code>0 0 8px rgba(209,254,23,.25)</code>

AI tool UX (bizga eng muhimi): Model selektori 56px balandlikdagi dropdown (ikona + nom + tavsif). Prompt maydoni `bg-white/[.04]`, focus'da lime-ring. Parametrlar slayderlar (lime trek + 18px lime thumb). Generatsiya jarayonida **radial lime glow animatsiyasi** (2.2s). Natijalar 2–3 ustunli `aspect-square` grid. 23 ta image + 13 ta video modeli toifalarga bo'lingan.

2.2 Motion Factory — yig'iladigan yon-panel

#91D010
Lime aksent

#B0FF0F
Generate CTA

#161515
Asosiy fon

#2A2A2A
Surface/input

#327BFA
Tanlash (ko'k)

#B9B9B9
Ikkilamchi matn

Shrift	Inter (400–800), titul 22px; Afacad — AI ovoz sahifa tituli uchun
Navigatsiya	Chap yon-panel: 65px (yig'ilgan, faqat ikona) ⇔ 235px (yoyilgan, label bilan). Bo'limlar: <i>Tool Box</i> (Voiceover, SFX), <i>My Hub</i> (Library, Bookmark)
Kontent	Web Component'lar <code>[active]</code> atributi bilan almashinadi; 200ms slide (left:100% → 0)
Kartalar	2 ustun (<code>calc(50% - 10px)</code>), hover'da video autoplay + pastki gradient overlay'da nom + tugmalar; tanlanganda <code>#327BFA</code> ramka
Qidiruv	Algolia; autocomplete popup, kategoriya keyword chip'lar

AI tool UX: AI ovoz — ovoz tanlash gridi (har ovozda noyob gradient), keyin generate sahifasi: prompt editor + 2 slayder (Emotion&Speed, Similarity) + oq generate tugma + wavesurfer.js audio player + kredit hisoblagich ("1000 belgi ≈ 28 kredit"). AI SFX — prompt + "Prompt Influence" slayderi + generate + generatsiya tarixi ro'yxati.

2.3 AssetFlow — joriy holat

#82c341
Brend yashil

#9fd356
Highlight

#0d0d0d
Asosiy fon

#141414
Surface

#6366f1
△ Qoldiq indigo

#a855f7
△ Qoldiq binafsha

Panel	Browse 380×720, Admin 420×760 — alohida CSS token to'plamlari (umumiy emas)
Navigatsiya	Chap ikona-rail (CEP'da 52px), 4 link: Video Templates / Motion Videos / Graphics / LUTs + pastki account-sheet modali
Shrift muammosi	chip 7px, featured strip 5–6px, meta 8–9px — o'qib bo'lmaydigan darajada mayda
Kartalar	shaffof fon, hover'da video; ★/ tugmalar <code>opacity:0</code> (faqat hover'da ko'rinadi)
Til	Aralash: nav inglizcha, qolgani o'zbekcha — i18n qatlami yo'q

3. Dizayn tokenlari taqqoslash jadvali

Token	Higgsfield	Motion Factory	AssetFlow
Aksent	#d1fe17 (neon)	#91D010 / #B0FF0F	#82c341 / #9fd356
Fon	#0a0a0a	#161515	#0d0d0d
Surface	#1c1e20	#2A2A2A	#141414 / #1a1a1a

Min shrift	10px	~8px	5–7px
Radius	izchil 4→16	10.5/13.2px	aralash 8/12/14/999
Navigatsiya	tab'lar	yig'iladigan sidebar	ikona-rail (tooltipsiz)
Tanlash rangi	lime ring	#327BFA ko'k	—
Hover preview	—	video autoplay	video autoplay
AI tool UI	to'liq (36 model)	ovoz + SFX	yo'q
Slayder/parametr	lime slider	custom slider	yo'q
Progress effekt	radial glow	spinner	linear bar
Skeleton loader	bor	spinner	bor (cold-start)
Dizayn izchilligi	yuqori	yuqori	past (2 avlod)
A11y	focus-ring, role	o'rta	deyarli yo'q

Asosiy kuzatuv
Uchchala plugin
bir xil "qora fon + lime yashil"
dizayn arxetipidan foydalanadi. Demak AssetFlow'ni qayta brendlash kerak emas — faqat
(1)
indigo qoldiqlarni olib tashlash,
(2)
shriftlarni o'qiladigan qilish,
(3)
Motion Factory'ning navigatsiyasi + Higgsfield'ning AI-tool naqshini qo'shish kerak.

4. AssetFlow UI/UX kamchiliklari

Quyidagilar haqiqiy kod tahlilidan aniqlangan — ustuvorlik bo'yicha guruhlangan.

Yuqori ustuvorlik (foydalanuvchini to'g'ridan-to'g'ri xafa qiladi)

1. O'qib bo'lmaydigan shriftlar.

Chip 7px, featured strip 5–6px, meta 8–9px — HiDPI ekran va 380px panelda ko'rib bo'lmaydi. *Yechim: minimum 11px, meta 10px, chip 9px.*

2. Ikki to'qnashuvchi aksent tizimi.

Yashil #82c341 bilan eski indigo #6366f1 /binafsha #a855f7 (featured banner, skeleton tugma, dropdown hover) aralashgan. *Yechim: barcha indigo'ni o'chirish.*

3. Hover-only tugmalar.

★ sevimli, o'chirish, overlay tugma — barchasi `opacity:0`, faqat hover'da ko'rinadi. Sichqonchasiz/birinchi qarashda topib bo'lmaydi. *Yechim: doimo ko'rinadigan, kontrastli ikonalar.*

4. Yig'ilgan sidebar tooltipsiz.

380px'da nav 52px ikona-railga aylanadi, `font-size:0` label, tooltip yo'q — 4 ikona noaniq. *Yechim: hover-tooltip yoki Motion Factory uslubidagi yoyiluvchi sidebar.*

O'rta ustuvorlik (izchillik va sayqal)

5. Mos kelmaydigan radius va thumb nisbati.

Karta 8px vs skeleton 12px; bitta elementda `aspect-ratio:16/9` va `16/10` ikki marta — yuklanishda layout sakraydi.

6. Browse va Admin umumiy dizayn tizimiga ega emas

— turli CSS o'zgaruvchi nomlari, ikki xil mahsulotday ko'rinadi.

7. Ortiqcha navigatsiya nazorati

— scope `<select>` va sidebar nav bir xil holatni boshqaradi (chalkash).

8. Soxta grid-view tugmasi

■ — handler yo'q, mavjud bo'lmagan list-view'ni va'da qiladi.

9. Profil bitta modalda ko'milgan

— login, plan, download papka, contributor, admin — hammasi pastki account-sheet'da; alohida profil tab yoki sozlamalar ikonasi yo'q.

10. Pagination / lazy scroll yo'q

— har filtr/qidiruvda butun grid `innerHTML` orqali qayta chiziladi; katalog o'sgani sayin sekinlashadi.

Past ustuvorlik (yetuklik / a11y)

11. A11y deyarli yo'q

— custom dropdown'lar oddiy `<div>`, `role / aria-expanded` yo'q, klaviatura qo'llab-quvvatlash yo'q, Esc-yopish yo'q, focus-trap yo'q, toast uchun live-region yo'q.

12. Light theme / theme toggle yo'q

— `prefers-color-scheme` hisobga olinmaydi (AE'ning yorug' rejimida panel mos kelmaydi).

13. Aralash til, i18n qatlami yo'q

— nav inglizcha, qolgani o'zbekcha.

14. Onboarding yo'q

— yangi/login qilmagan foydalanuvchi bo'sh grid ko'radi, "ulanish" chaqiruvi yo'q.

15. Katta preview / lightbox yo'q

— faqat inline autoplay; pack ochmasdan kattaroq ko'rib bo'lmaydi.

16. AI Tools / generatsiya bo'limi umuman yo'q

(6-bo'limda hal qilamiz).

17. Kolleksiya/papka, "yaqinda ko'rilgan", bulk amallar yo'q

— faqat tekis Favorites + Downloaded.

18. Per-karta yuklab olish indikatorlari yo'q

— faqat bitta global progress bar.

19. Server cold-start UI'da ko'rinadi

("server uyg'onmoqda ~60s") — UX hidi.

5. Birlashtirilgan dizayn tizimi

Savol: "Ikkala plaginning dizayni va UI/UX'ini birlashtirib mening plaginimga joriy qilsa bo'ladimi?"

Javob: Ha — va bu tavsiya etiladi.

Ular bir xil dizayn oilasidan (qora + lime). To'g'ri strategiya — **"eng yaxshisini ol"**

gibrid:

Motion Factory'dan tuzilma/navigatsiya

,

Higgsfield'dan komponent sayqali va AI-tool naqshi

, va

AssetFlow'ning o'z brend yashili

. Quyida tayyor token to'plami.

5.1 Yagona dizayn tokenlari (:root)

```
/* AssetFlow Unified Design System — har ikki panelda bir xil ishlatiladi */
:root {
  /* Ranglar — bitta yashil oilasi, indigo butunlay olib tashlanadi */
  --bg:           #0c0d0a; /* MF charcoal + sizning qora aralashmasi */
  --surface:      #161812;
  --surface-2:    #1e211a;
  --border:       rgba(255,255,255,.08);
  --border-hi:    rgba(159,211,86,.40);
  --accent:       #82c341; /* brend */
  --accent-hi:    #9fd356; /* hover/highlight */
  --accent-cta:   #a3e635; /* eng yorqin — Generate tugmalari (HF naqshi) */
  --accent-glow:  rgba(130,195,65,.28);
  --select:       #327bfa; /* MF: tanlangan element ko'k ramka */
  --text:         #f5f7f0;
  --muted:        rgba(255,255,255,.60); /* >= WCAG AA */
  --muted-2:      rgba(255,255,255,.42);
  --danger:       #ef4444; --warn:#f59e0b; --ok:#3fb950;

  /* Shrift — Inter (MF'dan), o'qiladigan minimal o'lchamlar */
  --font: "Inter", -apple-system, system-ui, sans-serif;
  --fs-xs:11px; --fs-sm:12px; --fs-md:13px; --fs-lg:15px; --fs-xl:19px; --fs-title:22px;

  /* Radius — bitta izchil shkala (HF naqshi) */
  --r-sm:6px; --r-md:10px; --r-lg:14px; --r-pill:999px;

  /* Masofa — 4px bazaviy birlik */
  --sp-1:4px; --sp-2:8px; --sp-3:12px; --sp-4:16px; --sp-5:20px; --sp-6:24px;

  /* Harakat */
  --ease: cubic-bezier(.4,0,.2,1); --dur:.18s;
}
```

5.2 Tavsiya etilgan panel tuzilmasi

Motion Factory'ning yig'iladigan sidebar'i + Higgsfield'ning toza kontent maydoni. Yangi **"AI Tools"** bo'limi navigatsiyaga qo'shiladi:

5.3 Komponent kutubxonasi (qaysi naqsh qayerdan)

Komponent	Manba naqsh	AssetFlow'ga qo'llanishi
Yig'iladigan sidebar	Motion Factory	Bosh navigatsiya, tooltip bilan, 64⇌220px
Hover-video karta	MF + AF (bor)	Doimo ko'rinadigan ★/↓, pastki gradient overlay'da nom
Tanlangan element ramkasi	Motion Factory	#327BFA 2px ramka (import uchun tanlangan sahna)
Model selector dropdown	Higgsfield	AI Tools: ikona + nom + tavsif, 56px
Prompt composer	Higgsfield	AI Tools matn maydoni, lime focus-ring
Parametr slayderi	HF + MF	lime trek + thumb, min/max label
Generatsiya glow	Higgsfield	radial lime glow (2.2s) — generatsiya kutilayotganda
Audio player	Motion Factory	AI ovoz natijasi (wavesurfer.js)
Bottom-sheet modal	AssetFlow (bor)	Profil/plan — saqlanadi, sayqallanadi
Toast + skeleton	AssetFlow (bor)	Saqlanadi; faqat live-region a11y qo'shiladi

Migratsiya strategiyasi (kichik qadamlar)

Hammasini bir vaqtda qayta yozmang.

(1)

token `:root` 'ni yangilang (1 fayl) → indigo yo'qoladi, shriftlar kattalashadi.

(2)

sidebar'ni tooltip + yoyilish bilan yangilang.

(3)

karta tugmalarini doimo-ko'rinadigan qiling.

(4)

AI Tools tab'ini qo'shing. Har qadam alohida deploy qilinadi.

6. AI Tools bo'limini qo'shish

Savol: "AI tools bo'limi qo'shish uchun nimalar qilish kerak?"

AssetFlow'da allaqachon kuchli poydevor bor — auth (PluginToken), subscription (FREE/PRO), R2 storage, SSE. AI Tools shu poydevor ustiga **proxy-route** sifatida o'rnatiladi: API kalitlar serverda qoladi, kreditlar subscription orqali nazoratlanadi.

6.1 Qaysi AI tool'lar (ustuvorlik bo'yicha)

Tool	Provayder	Foyda	Murakkablik
AI semantik qidiruv	OpenAI embeddings + pgvector	"kosmik intro kerak" → mos shablonlar	Past
AI ovoz (voiceover)	ElevenLabs	Shablonga ovoz qo'shish, MF'dagidek	O'rta
AI SFX generatsiyasi	ElevenLabs SFX / fal.ai	Prompt'dan ovoz effekti	O'rta
AI rasm generatsiyasi	fal.ai (Flux) / Replicate	Placeholder/thumbnail, mood-board	O'rta
AI auto-tagging	Vision model (server)	Contributor yuklaganda avtomatik teg	Past
AI video generatsiyasi	fal.ai / Veo / Kling	Higgsfield darajasi (qimmat)	Yuqori

Tavsiya:

AI semantik qidiruv + AI auto-tagging bilan boshlang (arzon, backend-only, darhol qiymat beradi), keyin AI ovoz + AI SFX (MF formulasi isbotlangan). Video generatsiyani oxiriga qoldiring.

6.2 Arxitektura

```
CEP Panel (AI Tools tab)
├─ prompt + params
└─
  POST /api/plugin/ai/voiceover (Authorization: PluginToken)
  │ ① auth middleware (mavjud) → userId
  │ ② subscription/credit gate (mavjud plugin-profile.ts kengaytiriladi)
  │ ③ provider proxy (ElevenLabs API key — faqat serverda)
  │ ④ natijani R2'ga yuklash → signed URL (mavjud pattern)
  │ ⑤ AiGeneration yozuvi (Prisma) + kredit yechish
  └─
    { url, creditsLeft } → panel → evalScript(import audio to AE)
```

6.3 Backend: yangi route (apps/api/src/routes/ai.ts)

```
import { Router } from "express";
import { requirePluginAuth } from "../middleware/auth";
import { consumeAiCredits } from "../lib/plugin-profile";
import { uploadToR2, signUrl } from "../lib/storage";

const router = Router();

router.post("/voiceover", requirePluginAuth, async (req, res) => {
  const { text, voiceId, stability = 0.4 } = req.body;
  // ① kredit tekshirish (1000 belgi ≈ 28 kredit – MF formulasi)
  const cost = Math.ceil(text.length / 1000 * 28);
  const gate = await consumeAiCredits(req.user.id, cost);
  if (!gate.ok) return res.status(402).json({ error: "INSUFFICIENT_CREDITS" });

  // ② provayderga proxy (kalit faqat serverda)
  const audio = await fetch(`https://api.elevenlabs.io/v1/text-to-speech/${voiceId}`, {
    method: "POST",
    headers: { "xi-api-key": process.env.ELEVENLABS_KEY, "Content-Type": "application/json" },
    body: JSON.stringify({ text, voice_settings: { stability } }),
  }).then(r => r.arrayBuffer());

  // ③ R2'ga saqlash + signed URL (mavjud pattern)
  const key = `ai/voice/${req.user.id}/${Date.now()}.mp3`;
  await uploadToR2(key, Buffer.from(audio), "audio/mpeg");
  res.json({ url: await signUrl(key, 3600), creditsLeft: gate.remaining });
});

export default router;
```

6.4 Prisma sxema qo'shimchasi

```
model AiGeneration {
  id          String  @id @default(cuid())
  userId      String
  type        AiToolType // VOICEOVER | SFX | IMAGE | SEARCH
  prompt      String
  resultKey   String?   // R2 key
  credits     Int
  createdAt   DateTime @default(now())
  user        User      @relation(fields: [userId], references: [id])
}

enum AiToolType { VOICEOVER SFX IMAGE SEARCH }

// PluginProfile'ga qo'shing:
// aiCredits      Int @default(50) // FREE: oyiga 50, PRO: 1000
// aiCreditsReset DateTime
```

6.5 Frontend: AI Tools tab UI (Higgsfield naqshi)

AI Ovoz AI SFX AI Qidiruv 42 kredit

Matn kiriting: "Mahsulotimizni taqdim etamiz..."

Ovoz: Jessi ▾ Emotsiya —●—

Generatsiya qilish

```

<!-- AssetFlow_Plugin.html — yangi AI Tools paneli -->
<div id="ai-tools" class="page" hidden>
  <div class="ai-subtabs">
    <button class="subtab active" data-tool="voiceover">AI Ovoz</button>
    <button class="subtab" data-tool="sfx">AI SFX</button>
    <button class="subtab" data-tool="search">AI Qidiruv</button>
    <span class="credit-pill">< <span id="ai-credits">42</span> kredit</span>
  </div>
  <textarea id="ai-prompt" class="ai-prompt" placeholder="Matn kiriting..."></textarea>
  <select id="ai-voice" class="ai-select">...</select>
  <input type="range" id="ai-stability" class="ai-slider">
  <button id="ai-generate" class="btn-cta"> Generatsiya qilish</button>
  <div id="ai-result"></div> <!-- audio player + "AE'ga import" tugma -->
</div>

```

6.6 Natijani Adobe'ga import qilish

```

// Generatsiya tugagach: faylni yuklab, AE'ga import qilish
async function importAiResult(signedUrl, fileName) {
  const tmpPath = await downloadToTemp(signedUrl, fileName); // mavjud https.get pattern
  // mavjud host.jsx import funksiyasidan foydalanish
  evalJSX("importMediaFromPath", tmpPath); // §5.2 typed wrapper
  showToast("AI natija AE'ga import qilindi ✓", "success");
}

```

Muhim qoidalar

- **API kalitlar hech qachon panelda bo'lmasin**
 - faqat serverda (Motion Factory'ning hardcoded kaliti — aks misol).
- **Kredit gate'ni serverda tekshiring**
 - frontend'da emas (chetlab o'tilishi mumkin).
- **AI = PRO funksiya yoki kredit-asosli**
 - mavjud subscription tizimingizga ulang.
- **Rate limiting**
 - qimmat provayderlar uchun har foydalanuvchiga limit qo'ying.

7. Yo'l xaritasi

Bosqich	Vazifa	Tafsilot	Sa'y
0 — Blocker	ZXP paketlash & imzolash	ZXPSignCmd bilan; bunsiz foydalanuvchi o'rnata olmaydi	Kritik
1 — Dizayn (1-2 hafta)	Yagona token <code>:root</code>	Indigo o'chirish, shrift ≥11px, Inter shrifti — bitta fayl o'zgartirish	Past
	Sidebar + tooltip	Yig'iladigan navigatsiya (MF naqshi), 64⇌220px	O'rta
	Karta tugmalari	★/↓ doimo ko'rinadigan, kontrast oshirish	Past
2 — Funksiya (2-4 hafta)	evalJSX typed wrapper	Injection xavfini tugatish, host.jsx uchun	Past
	Sentry + version check	Xato monitoring + update notification	Past
3 — AI Tools (1-2 oy)	AI semantik qidiruv + auto-tagging	Arzon, backend-only, darhol qiymat	O'rta
	AI Ovoz + AI SFX	ElevenLabs proxy, kredit gate, audio pleyer, AE import	O'rta
	AI Tools tab UI	Higgsfield naqshi: model selector, prompt, slayder, glow	O'rta
4 — Kengaytma	Premiere Pro, Algolia, AI rasm/video	Multi-app, professional qidiruv, qimmat generatsiya	Yuqori

Yakuniy xulosa

AssetFlow allaqachon

to'g'ri arxitektura

da — to'liq SaaS backend, contributor workflow, moderatsiya. Ikkala referensdan o'rganish kerak bo'lgan narsa — bu

biznes-mantiq emas, balki sayqal

: izchil dizayn tizimi (Higgsfield), navigatsiya tuzilmasi (Motion Factory) va AI-tool integratsiyasi (ikkalasi ham). Bularning hammasi sizning kuchli poydevoringiz ustiga qurilishi mumkin — qayta yozish kerak emas, faqat ustiga qurish kerak.
